COVER STORY

Eviuma CONTINUED FROM PAGE 10

Railroad Ave. Shelton, WA.
Home of Mason County PUD 2

"Tidbit" The key, a locomotive built in 1924, sits next to the post office, anchoring the historic town center, antique shops and small businesses line Railroad Avenue. In the evening, the decorative postcard and streetlights that run along the busy street give off a warm glow - the warm glow of LED.

Railroad Avenue's ornamental streetlights installed in the mid to late 1990s and maintained by Mason PUD 2 represent a great deal of maintenance. Knowing the bulbs on the 20 year-old fixtures would need changing again soon, Justin Holmgren, Engineering Services & Community Relations Manager at Mason PUD 2, was looking for an LED option that would eliminate the constant upkeep required by HID lights, yet still deliver the warm look that residents and

visitors had come to expect.

"The people at Eviuma have always been very responsive and a pleasure to work with."

The team at Mason PUD 2 used several different solutions including compact and downlights. "Anything less than a 10 year warranty was a non-starter for us. None didn't fit our fixtures, one was too tall and downlights weren't appropriate for our ornamental fixtures," stated Justin. Mason PUD 2 also obtained a sample OmniMax by Eviuma. The OmniMax in their fixtures met their pre-requisite of a 10-year warranty and came in a 2008K color temperature. "The goal was to keep that golden look for the downtown corridor. The color of the 2008K OmniMax was more 'yellow' than beige. It didn't

pressure the wall glow that suggests a small town charm." Having worked with Eviuma since 2014 when Mason PUD 2 adopted the OmniMax LED Street Lights in their light standard for residential lighting, their choice was made. "The people at Eviuma have always been very responsive and a pleasure to work with."

Retrofitting with the Eviuma OmniMax

A total of 45 fixtures were retrofitted with the Eviuma OmniMax. The 70W 10% bulbs in the decorative postcard lights were replaced with 70W LED OmniMax. The 200W 10% bulbs in the standing roadway lights were also replaced with 70W 110 OmniMax. "With the bulbs collected in the 2009 HID lights we

The New 100W OmniMax

- Rise Higher
- Go Farther
- Shine Brighter
- Work Smarter

More light. Dependably beautiful.
With light output competitive to a 150W HID, you get more lumens, across a broader range of applications, without compromising light quality.

You asked, and we delivered. The 100W OmniMax LED retrofit was designed specifically for applications where you need more light from your decorative fixtures, such as taller pendant and teardrop applications (>25'), and locations where decorative luminaires are the primary light source.

A new patented Eviuma driver delivers higher lumen output, even at lower CCT levels. Pair that with OmniMax's revolutionary low-glare optics, and you get the kind of light your decorative fixtures were built for: warm, beautiful and bright.

Protect Yourself

Miller Safety Consultants — *A Leader in Arc Flash Protection*

Vince Miller started Miller Safety Consultants, a veteran owned business in 1999. The goal of the business was to provide cost effective safety consulting, employee training such as: confined space entry, fall protection, electrical safety and provide sales of electrical shock and flash protective equipment and fall protection equipment to businesses in the Washington DC area.

Reliance Industries provided fall protection products and much of the sales and training was on behalf of the supplier. In 2000, the owner decided to retire from his business, and Vince decided to discontinue the fall protection line of his business and concentrate more in the electrical training and products.

Vince had been a distributor for Certified Insulated Products (CIP), a manufacturer of electrical insulated tools and electrical arc flash clothing manufactured by Otex in Rochester, New York. As a distributor, Vince provided sales through his internet website and much through relationships with electrical contractors. His training was a classroom environment and was provided directly to customers but he also taught as a sub-contractor for other safety consulting companies and the

Chesapeake Safety Council in Baltimore, Maryland. In 2005, Vince partnered with Vivid Learning Systems in Cascades, Washington to provide on-line training in safe work practices.

Training in electrical safe work practices is still provided locally in the Washington DC area and as a partner with an electrical engineering firm and online. The training is based on the Occupational Health and Safety Administration (OSHA) standards and the National Fire Protection Association (NFPA) 70E standard.

Miller Safety Consultants is now a distributor for Cementex USA, Burlington, New Jersey, for insulated tools and equipment and clothing from OTEX Protective, Rochester, New York.

The majority of his sales of products are from the web-based store. Cementex is

nationally known for their quality equipment. Otex Protective is becoming more known for their quality clothing. For years, they have manufactured their products under other provider labels. Vince chose to not create his clothing line, but to sell the manufacturer product.

Vince has worked with many electrical company employees to fine-tune the clothing to be more comfortable for the user. Working closely with the manufacturer, they have made slight changes in how the cloth pattern was modified to meet final production. An example is the lightweight 40 Calorie vented hood offered by Otex.

The material is of the latest technology. The vented assembly is constructed for balance on the back of the hardhat and the airflow is 27 CFM to prevent fogging of the face shield and provide cooling to the worker. It took over a year to develop the product with the user prior to having the hood “flash tested”. This product is now standard issue with many electrical contractors.

Being a small business and having quality providers has resulted in satisfied customers for Miller Safety Consultants. Being a direct supplier for OTEX Protective, another small business means customized customer needs can be met. □

The V5™ 40 Cal Ultralight Lift Front Hood System

1. V5™ High-Volume Ventilator with ArcSense Interrupter™
 - Patent-Pending ArcSense Interrupter™ shuts off airflow after an arc flash, preventing further inhalation of manganese fumes
 - 27 CFM blower fans
 - Snap-in design, removable in seconds
2. Milwaukee M12 rechargeable battery and receiver
3. 1:1 Balance: Perfectly balanced back-to-front
4. Paulson face shields and brackets
5. Hood Handle for easy removal or transport
6. LED Head Lamp included

ULTRALIGHT Premium

Protect yourself from "Arc Flash"

ARC FLASH LIFT-FRONT HOOD WITH V¹² HIGH-VOLUME VENTILATOR Compact. Powerful. Reliable

Our V¹² High-Volume Ventilator boasts an unexpectedly quiet, high output (35+ CFM) turbine fan to cool and circulate the ambient air within the hood. Fully protected beneath it's durable ABS shell and added fabric layering, the V¹² High-Volume Ventilator isn't just compliant, it's superior.

40 CAL/CM2 ULTRALIGHT CLOTHING BY OTEX

Our new dual-layer Ultralight clothing takes advantage of DuPont's® dedication to scientific advancement and Westex's® industry leading dependability. Weighing in 37% lighter than traditional HRC4 PPE, our Ultralight Clothing is the most innovative contender in the lightweight arena.

HYBRID LAYERING

Compact and Easy to Install DC UPS for Harsh Industrial Locations

SolaHD™ SDU DC - B Series DIN Rail UPS

The SolaHD™ SDU DC - B Series DIN Rail UPS by Emerson are perfect for mitigating power quality issues, minimizing loss of data and downtime.

The SDU DC - B UPS combines an industry leading compact design, wide operation temperature range -15 °C to +50 °C (+5 °F to +122 °F), enhanced communication and unique installation options to solve common application problems.

Extend Luminaire Life While Reducing Energy Consumption

Appleton™ Mercmaster™ Connect LED

The Appleton™ Mercmaster™ Connect LED by Emerson is designed to illuminate hazardous and harsh industrial locations with integrated motion and illuminance sensors. Paired with Emerson's Plantweb Insight Connected Lighting Application, operators have access to lighting usage data and sustainability analytics.

The Mercmaster Connect LED provides facility managers with continuous monitoring of their LED lighting with real-time insights gained into sustainability goals, diagnostics and lumen levels from any remote location at dramatically lower costs as compared to wired alternatives, with faster installation time and minimal disruption to plant operations.

Model 6529

TRUE MegOhmmeter®

- Easy-to-handle, lightweight, compact and rugged
- Selectable test voltages 50, 100, 250, 500, and 1000V
- Basic DMM functions; Volts, Continuity and Resistance
- Automatic power-off function to optimize the battery life
- 2-color backlighting easily shows alarm conditions
- DMR mode - relative resistance comparison to a reference value
- Dual line display to view the insulation value and real-time test voltage simultaneously in an easy-to-read format
- Adjustable support for improved viewing when used on a bench or other flat surface
- Programmable alarm thresholds

Our products are backed by over 125 years of experience in test and measurement equipment, and encompass the latest international standards for quality and safety.

INSTRUMENTS
CHAUVIN ARNOUX GROUP

Install Peace of Mind...

RANDL Industries, Inc. is an electrical box manufacturing company dedicated to creating innovative solutions to industry challenges. RANDL Industries, Inc. is located in Spokane Valley, Washington. They invented and manufactured the first ever 5 Square® products.

RANDL's Founder and President, Robert Hagarty, spent nearly 30 years as an electrical superintendent and foreman in the electrical construction and installation industry and has been a member of IBEW Local 73 for many years. Over the years, Bob began to notice that the occurrence of ground faults and short circuits in fire alarm systems had become an increasingly severe issue and began tracking the associated troubleshooting hours. Realizing that the problem stemmed from the use of standard electrical boxes, Bob designed and created an entirely new line of back-boxes which he named the 5 Square®. The patented 5 Square® Box (5" x 5" x 2.875") eliminates ground faults and short circuits at the appliance due to the added volume of the box and space around the perimeter of the appliance.

The 5 Square® also dramatically reduces stress on terminals resulting in fewer damaged appliances. In addition, a major fire signal manufacturer allows a full complement of conductors to be routed in the box per NEC Table 314.16(B). This allows additional circuits and zones to be pulled through the 5 Square®, potentially reducing conduit. All of these advantages tend to save contractors \$20 - \$30 per installed appliance.

RANDL's second generation of innovative products culminated in their 5 Square® Telecommunications Box. What makes the 5 Square® Telecom Box so special? In addition to the increased size and volume, which allows for slack cable/service loop in the box, the 5 Square® Telecom Box incorporates a cable management system guaranteeing minimum bend radius as required by cable manufacturers. Historically, infringement of cable bend radii was not an issue, but due to current and future transmission rate increases, bend radius observance is now very critical. The 5 Square® Telecom Box supports categories 5e, 6, Augmented 6, 7, Augmented 7, and optical fiber cables as well as expected future generations

of cable sizes. Slack cable/service loop in the box reduces labor during installation as well as future maintenance labor which further increases cost savings.

Due to the value added benefits and related cost savings of the 5 Square® products many engineering firms, universities, hospitals, and government agencies have become avid proponents and specifiers of the products.

The 5 Square® Boxes have a complementary line of plaster rings that adapt from 5 Square® to 4 square and from 5 Square® to standard 1 and 2 gang openings in depths from flat up to 2 inches. There is also an adapter from 5 Square® to 4-11 for mounting fire alarm zone modules.

Create a Robust and Unrivaled Infrastructure for the Life of your Facility with the 5 Square® Products!

For more information on the 5 Square® Products please contact us at (509) 340-0050 or sales@randl-inc.com. You can also learn more at www.randl-inc.com. Thank you for choosing RANDL Industries, Inc. □

Avoid the dangers of foreign knock-offs and only buy American Made RANDL products!

RANDL
INDUSTRIES, INC.

First there was 4 square... and now the **REVOLUTIONARY 5 Square®** Box!!

You've struggled with 4 Square boxes for years - you know how small, cramped and time consuming they are. Finally, there is a solution that allows you the space you have always needed.

The **5 Square®** Boxes (5" x 5" x 2-7/8") provide up to 88 in³ of interior volume which more than doubles that of most existing boxes on the market.

Create a robust and unrivaled infrastructure for the life of your facility with the **5 Square®** Products!

About Us:

iTOOLco is a unique research and development company that has led the electrical tool industry with their groundbreaking designs since 2001. iTOOLco's inventors & Co-Founders David & Michael Jordan have developed and patented countless innovative products, pushing the envelope of what can be done to improve the lives of electricians and distribution partners alike. iTOOLco has been awarded prestigious accolades, including numerous NECA Showstopper Awards, for its groundbreaking work in

the electrical field. Based in Clinton, TN, iTOOLco is dedicated to creating the highest quality American made products, backed by an industry leading 6 year warranty.

With real world experience as electrical contractors, brothers David and Michael Jordan have a deep understanding of the kind of quality, time-saving tools electricians depend on for doing the job right. Over the years iTOOLco has revolutionized the wire pulling market with the introduction of the first ever 12,000

lb. puller - the Cannon 12K, with built in reverse. As well as their Cordless Cannon 3K & 6K (the first on the market of each, respectively). Capable of reaching areas where power may not be available, these pullers allow users to achieve the same amount of power, without worrying where it will come from. Also known for their Gear Punch which includes lifetime replacement on draw studs, Tray Rollers, numerous Material Handling solutions, etc. iTOOLco ensures that no matter the job, we have a solution. □

INNOVATIONS

Faster Safer Workspace

iTOOLco.

ALL JACK™

Increase productivity and decrease fatigue using iTOOLco's All Jack™. Install pipe, lights, cabinets, drywall, temporary dust barriers and much more with this innovative jack designed to lift and support the weight of your workpiece while you anchor it into position.

High ceilings and ladder work are not a problem for this dynamic tool. Reach from 58" to a staggering height of 13'6". The industrial gas shock ensures a snug, stable support that stays in place while you complete the installation. Once your workpiece is secured into place, simply remove the All Jack™ by releasing the shock. More powerful than a typical support pole, the All Jack's gas shock can handle your most challenging jobs.

SCAN QR

CORDLESS CANNON 6K™

Speed, versatility, and performance are all yours with iTOOLco's Cordless Cannon 6K™. This portable 6,000 lb. puller is intuitively designed to handle all of your day-to-day wire pulls.

The built-in capstan switch automatically turns the puller on and off. Simply tug on the rope to start the pull and slack off the rope to shut it down. Delivers dynamic performance in remote locations or areas where power is not yet available.

Conduit Repair Systems, Inc.

The old saying, “necessity is the mother of all inventions” holds true for Conduit Repair Systems, Inc. Our split conduit products were originally designed and developed by a cable TV technician and his father-in-law that worked as an engineer. The technician found that he needed a repair product that truly restored damaged PVC pipe to its original state. The technician did some research and found that what he needed didn’t exist at the time. The two men then developed our patented snap together split conduit products. Since the early days of the company, many additional applications for the products have since been discovered including enclosing exposed cables, relocating aerial lines to underground, enclosing cables on bridges, protecting cables on telephone poles, enclosing fiber optics, and relocating cables along roads.

Conduit Repair Systems, Inc. formally began business operations in 1995

and has seen exponential growth ever since. Our company is headquartered in St. George, Utah, which is located about 100 miles North East of Las Vegas, Nevada along Interstate 15. The company chose St. George because of its reputation as the “Palm Springs” of Utah. The warm weather, the world-class golf courses, combined with a very qualified work force made the selection to locate in St. George very easy. Over the past thirteen years Conduit Repair Systems, Inc. has become the world-leading manufacturer of split conduit products. Conduit Repair Systems manufactures split conduit, split couplings, split sweeps, and other related split conduit products specifically designed for electrical, cable TV, and communications applications.

CRS offers its products in a variety of sizes including 1 inch, 1 ¼ inch, 1 ½ inch, 2 inch, 2 ½ inch, 3 inch, 4 inch, 5 inch, and 6 inch.

Conduit Repair Systems, Inc. executive staff consists of highly qualified professionals. The President of the company, David Clove, is a CPA and is also a former Finance Manager for Arizona Public Service. Our National Sales Manager, Paul McMullin, brings twenty years of industry sales experience to the company. All of our manufacturing personnel also have many years of professional experience in the plastics industry.

CRS currently services public utilities, rural electric associations and co-ops, cable TV companies, telephone companies, and electrical contractors through a wide range of distributors located throughout the United States, Canada, Mexico, Japan, Europe, and the Middle East.

If you would like more information regarding our company you can obtain additional information at our website located on the Internet at www.conduit-repair.com.

We believe that no one helps you repair or protect your underground distribution or cable network like

“Proud to be the Installers’ Friend” **DO JOBS SAFER - BETTER - FASTER**

WE BEGAN IN 1966 based on more than just making a fair profit. S-P Products Inc.’s philosophy and dedication to making valid contributions to the industry began with “Econo-Whips”; no-center stop couplings and prefabricated assemblies. Our first whip machine we produced was in 1969; any size, length, steel or aluminum flexible conduit, MC Cable, Liquidtight, Cord Romex, etc., with any type connectors attached. Then we moved to wire harnessing by innovating industry with “one pull and you’re done” concept thus minimizing waste and increasing efficiency. We moved on with our UL Listed Qwik Duct templates meeting job and engineer specifications on many high profile jobs throughout the country.

Our motto is to care for our country, in-

dustry and electricians by encouraging everyone to buy and install quality Made in U.S.A. innovative products for Safer-Better-Faster jobs and provide opportunities with fair compensation for current and future generations in this country.

We develop and promote products that accomplish these goals and are proud to being the electrician’s friend by providing them the satisfaction of making valuable contribution to the industry and receiving fair compensation for their ideas. We also provide excellent quality and service at competitive pricing.

S-P Products provides labor saving devices and products to ease electrical construction projects.

Products like EZ PULL EZ READ Wire Harnesses, Qwik Duct Templates, Transition Fittings, Conduit and Box

Support Plates and Trapeze Brackets are some of our high quality, innovative products providing certifications and meeting industry standards.

Many of our products have been invented by experienced electricians. We are very proud of being a dedicated NJATC Training partner, striving to improve our industry any way possible.

Our manufacturing facilities help keep electricians off the bench and good paying jobs in our country.

Think of us as your Prefab shop to meet all high demand requirements and fast paced projects by bidding quicker and securing more jobs.

Visit us at www.spproducts.com or call us 1-800-233-8595 with your IDEAS, inquiries and we will be your partner on your road to success. □

SPPRODUCTS, INC.

DRIVEN TO DELIVER

THE CONSOLE X

Your Total Mobile Office Solution

The Truck Console -X combines your Laptop Work Station, Radios, Speakers, Cables, Storage and Cup Holders, No Drill Installation Brackets Included.

The **Truck Console -X** is the latest innovative mobile office solution to join the Mobile Desk brand family of products. This complete control, communication and convenience Utility Truck Console is becoming the new standard for fleets of all sizes. The design of the **Truck Console -X** has originated from our years of experience working directly with the lineman, supervisors, communications, and fleets of some of the most notable utility companies in America. Loaded with standard and optional features that maximize ergonomics, productivity, and fleet/telecom standards into one Mobile Office Solution.

Screen Out™ SCREEN-DISABLER™
Blanks your screen while you drive!

Our Patented Screen Out App **Stops texting** while driving for all employees on all tablets, laptops and smart phones that run Windows, iOS or Android Operating Systems. **It's that easy!**
