TOP PRODUCTS 2022 Electrical Products & Solutions

Speed, versatility, and performance are all yours with iTOOLco's Cordless Cannon 6K™. This portable 6,000 lb. puller is intuitively designed to handle all of your day-to-day wire pulls.

The built-in capstan switch automatically turns the puller on and off. Simply tug on the rope to start the pull and slack off the rope to shut it down. Delivers dynamic performance in remote locations or areas where power is not yet available.

Protect Yourself

Miller Safety Consultants — A Leader in Arc Flash Protection

Vince Miller started Miller Safety Consultants, a veteran owned business in 1999. The goal of the business was to provide cost effective safety consulting, employee training such as: confined space entry, fall protection, electrical safety and provide sales of electrical shock and flash protective equipment and fall protection equipment to businesses in the Washington DC area.

Reliance Industries provided fall protection products and much of the sales and training was on behalf of the supplier. In 2000, the owner decided to retire from his business, and Vince decided to discontinue the fall protection line of his business and concentrate more in the electrical training and products.

Vince had been a distributor for Certified Insulated Products (CIP), a manufacturer of electrical insulated tools and electrical arc flash clothing manufactured by Otex in Rochester, New York. As a distributor, Vince provided sales through his internet website and much through relationships with electrical contractors. His training was a classroom environment and was provided directly to customers but he also taught as a sub-contractor for other safety consulting companies and the Chesapeake Safety Council in Baltimore, Maryland. In 2005, Vince partnered with Vivid Learning Systems in Cascades, Washington to provide on-line training in safe work practices.

Training in electrical safe work practices is still provided locally in the Washington DC area and as a partner with an electrical engineering firm and online. The training is based on the Occupational Health and Safety Administration (OSHA) standards and the National Fire Protection Association (NFPA) 70E standard.

Miller Safety Consultants is now a distributor for Cementex USA, Burlington, New Jersey, for insulated tools and equipment and clothing from OTEX Protective, Rochester, New York.

The majority of his sales of products are from the web-based store. Cementex is nationally known for their quality equipment. Otex Protective is becoming more known for their quality clothing. For years, they have manufactured their products under other provider labels. Vince chose to not create his clothing line, but to sell the manufacturer product.

Vince has worked with many electrical company employees to fine-tune the clothing to be more comfortable for the user. Working closely with the manufacturer, they have made slight changes in how the cloth pattern was modified to meet final production. An example is the lightweight 40 Calorie vented hood offered by Otex.

The material is of the latest technology. The vented assembly is constructed for balance on the back of the hardhat and the airflow is 27 CFM to prevent fogging of the face shield and provide cooling to the worker. It took over a year to develop the product with the user prior to having the hood "flash tested". This product is now standard issue with many electrical contractors.

Being a small business and having quality providers has resulted in satisfied customers for Miller Safety Consultants. Being a direct supplier for OTEX Protective, another small business means customized customer needs can be met. ❑

For more information, visit Miller Safety Consultants at: www.electricalsafetysupply.com, email Vince at: sales@millersafetyltd.com

2023 TOP PRODUCTS

Each year we choose what we believe are **Top Products** in the Electrical Industry market. This year is no different. The products and services chosen are each unique, beneficial and reliable in their own right. Having the ability to choose the tools and services that best fits your job description and your work style is what it's all about. We hope you agree with our choices.

Appleton™ Mercmaster™ Connect LED Luminaire

The AppletonTM MercmasterTM Connect LED Luminaire by Emerson is designed to illuminate hazardous and harsh industrial locations with integrated motion and illuminance sensors. This groundbreaking solution dramatically lowers cost when compared to wired monitoring alternatives, with faster installation time and minimal disruption to plant operations.

Mercmaster Connect LED Luminaires are linked wirelessly to Plantweb Insight™ software via Emerson WirelessHART™ network technology. With quick and accurate data analysis made possible by Plantweb Insight, it is much easier to prioritize maintenance and identify potential hazards or failures that may put the safety, reliability, and compliance of a facility at risk.

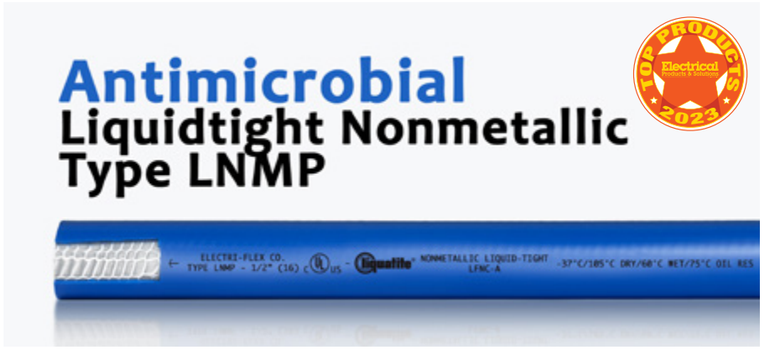
Innovative Two-Piece Split Conduit and Split Coupler System

As the world leader in split conduit repair products, Conduit Repair Systems' provides an array of products to offer you the perfect solution for your repair needs. Conduit Repair Systems innovative two-piece split conduit and split coupler system is available in ten-foot split conduit lengths, pre-bundled repair kits, split WYE kits, and our industry leading split sweeps.

Conduit Repair Systems' split sweeps are available in a 24" or 36" radius and come in both 45° and 90° sweeps. They are great for electrical conduit applications underground, being encased in concrete, as risers coming up and out of the ground, for solar projects and more. All of our split sweeps are available in the following sizes: 1", 1.25", 1.5", 2", 2.5", 3", 4", 5", and 6".

With our two-piece split conduit system, no tape, straps or clamps are needed. Everything is done in a snap!

For more information, visit www.conduitrepair.com



Type LNMP Food Grade

UL-listed, flexible liquidtight, nonmetallic conduit Type LNMP-Food Grade now has an improved antimicrobial jacketing that offers a wider temperature range and is made with a new food processing blue jacketing. Type LNMP is made of flexible PVC with a nylon reinforcing braid and is ideal for continuous flexing applications as it does not contain a metal core that could fatigue with repeated flexing. The flexible PVC jacketing now contains an antimicrobial biocide additive. This additive inhibits the growth of commonly known food processing microbes, such as E. coli, listeria, and salmonella, and even shows a reduction of these microbes over a 24-hour period. Type LNMP is ideally suited for Food Processing, Pharmaceutical, Bottling Equipment, and Clean Room installations. It is UL listed (cULus), a Certified Component for NSF/ANSI 169 special purpose food equipment, meets FDA CFR21 & NSF 51/61 requirements, is WEEE & RoHS Compliant, and is ARRA Certified.

For more information, visit
www.electriflex.com

New UltraLite 40 Cal Lift-front Vented Hood

We've listened to our users who perform "non-contact" testing within the arc-flash protection boundary and have release the OTEX lift shield hood. This new style hood will incorporate the Paulson lift shield assembly. The new hood assembly will also have the additional safety features of our standard M12 vented 40 Cal hood such as the patented arc flash sensor, head lamp and the Milwaukee M12 battery powered fan system.

iTOOLco's Strut Mount System

Who doesn't hate using spring nuts? Strut installations are 2x faster with iTOOLco's Strut Mount System. Our new Strut Mount makes joining two struts together a snap. Adding cross members to strut structures or building new structures is simple. Determine the height of the cross strut, then install the bracket at that mark & you're done. Where existing spring nuts can slide out of place, making alignment of hardware a tedious task. The iTOOLco strut mount utilizes a "Stud Mount System" that places all the load between the welded stud of the bracket and the slot of the strut for easy & precise placement of cross members. The Strut Mount has a load rating up to 750 lb per unit when using pins and up to 1,200 lb per unit when using 3/8" bolts.

For more information, visit www.iTOOLco.com

iTOOLco's Ground Rod Dawg XL

With two models available, safely drive three quarter or one inch rods from ground level with iTOOLco's Ground Rod Dawg XL's. The Ground Rod Dawg XL eliminates the need for climbing up ladders and using sledge hammers to drive large ground rods under grade. Simply plug the Ground Rod Dawg XL into y our hex shank jack hammer. Then insert the bottom of the rod into the Ground Rod Dawg XL and go. The unique design allows the Ground rod Dawg XL to bite down onto the rod, allowing the user to drive it in with ease. Once the rod is driven in far enough, use the end receiver on the top of the rod to finish driving it to the final grade level.

M18™ FORCE LOGIC™ Single Channel Strut Shear Kit

The M18™ FORCELOGIC™ Single Channel Strut Shear is the Most Productive Way to Shear Strut on the jobsite. Utilizing Milwaukee® proprietary Shearing Dies, the Strut Shear delivers square, clean shears without additional filing or deburring. The integrated strut support plate offers a quick 4in/10cm measurement offset for simple, repeatable shears increasing productivity on site. The Strut Shear's dual die design eliminates exposed blades and reduces the chance of cut and laceration injuries on jobsites. This highly portable Strut Shear offers unmatched versatility allowing you to easily shear on any flat surface or chain vice at the point of installation around the jobsite. The integrated tri-stand chain vice mount allows seamless integration into any brand chain vice to keep users productive. Featuring Milwaukee® ONE-KEY™ Technology, view tool usage, receive notifications for recommended maintenance, and lock the tool out for added security to protect your investment. The kit includes (1) 1-5/8" x 1-5/8" Single Channel Shearing Dies, (1) M18™ XC 5.0 REDLITHIUM™ Battery, M18™ and M12™ Multi-Voltage Charger and a soft-sided carrying bag with pockets that can accommodate (3) additional Shearing Die Sets. Additional Accessory Dies available: 13/16" x 1-5/8" Dies (49-16-1316), 7/8" x 1-5/8" Dies (49-16-0078), Combination 13/16" & 1-5/8" Dies (49-16-1513), and Combination 7/8" & 1-5/8" Dies (49-16-1578).

clipx WIRE assist system

The customizable clipx WIRE assist system from Phoenix Contact helps panel builders improve wire processing efficiency.

The clipx WIRE assist software increases wire processing productivity and improves consistency. The software controls the wire cutting and labeling devices, guiding the user through clear onscreen instructions on a laptop or touchscreen. The program can be used with the CUTFOX 10 wire cutting machine, the THERMOMARK ROLL series printers, the CF3000 wire stripper and ferrule crimper, and the CF500 ferrule and lugs crimping machine.

The optional clipx WIRE assist workbench is an ergonomic and efficient workstation that keeps everything a panel builder needs within reach. The technician can quickly adjust the tabletop's height and easily maneuver the mounted machines. The workbench also features wire spool rods or mounting shelves for quick access to wires.

The clipx WIRE assist system is customizable, making it suitable as a standard shop bench or a flexible workbench.

The IMPULSE PHASER

The IMPULSE PHASER was originally developed in the early 1950's to increase personnel safety when working on paper insulated, lead covered cables. Since its introduction, the IMPULSE PHASER has been used safely and reliably by electric utilities throughout the U.S. on solid dielectric cables and paper insulated, lead covered feeders in excess of 20 miles and even on submarine cable 300 feet underwater. Because safety is most important, the IMPULSE PHASER is designed to operate only if the cable circuit to which it is connected has been shorted and grounded. Also, the transmitted signal cannot be imposed on any other cable in the circuit. The IMPULSE PHASER promotes safe, positive identification of cables. The IMPULSE PHASER is designed and built to withstand the normal use generally associated with linemens' tasks. Because the IMPULSE PHASER is well constructed, you get an instrument which is economical to purchase and maintain, providing years of reliable service.

For more information, visit www.timcoinstruments.com

Duct Spacers and Nonmetallic Cable Supports

Undrground Devices manufactures several different styles of duct spacers and nonmetallic cable supports. The Heavy Duty Nonmetallic Cable Rack has become a standard in manhole racking. The Heavy Duty Rack is nonconductive and will never rust or corrode. Grounding and insulators are no longer necessary. The Heavy Duty Rack has the same loading capacity as comparable steel cable racks. With seven standard stanchion lengths ranging from 8" to 48" long, and ten arms ranging from a 3" saddle to a 20" long arm, the Heavy Duty Rack is an extremely versatile cable racking system.

Russelectric Cogeneration Systems for CHP Applications Offering Generator Paralleling Control, Active Synchronization and Soft Loading

Russelectric, A Siemens Business, a leading manufacturer of automatic transfer switches and power control systems, manufactures UL-listed cogeneration systems for combined heat and power (CHP) applications in which the generator sets are run to serve the connected load and heat is also recovered for other uses. Designed and built for mission critical facilities such as healthcare, research and development and campus facilities, Russelectric cogeneration systems are designed to provide maximum protection for operators and maintenance personnel and to minimize the danger of operator error.

All Russelectric cogeneration systems are UL listed, offer programmable logic controller (PLC) system controls, and are supervisory control and data acquisition (SCADA)-capable. They feature utility/generator and other power assets paralleling control, and provide active synchronization and soft loading. Systems use a utility-approved interconnecting protective relay system.

Russelectric cogeneration power control switchgear may have additional controls and monitoring to optimize heat recovery. The systems can be designed to operate in parallel with the utility to optimize power and heat balance.

Russelectric manufactures complete systems in-house. All enclosures, bus, and other structural components are fabricated and fully assembled in Russelectric plants. Factory testing of complete systems is performed prior to shipment.

Components are selected to assure the reliable operation of these critical systems. Utility-grade instruments provide both accuracy and visibility. Heavy-duty, switchboard type control switches are rated at a minimum of 25 amps. Protective relays for generator and utility power are utility-grade. UL-listed power circuit breakers with stored energy closing mechanisms provide 5-cycle (maximum) closing for paralleling. Draw-out circuit breakers simplify maintenance. ❑

ABOUT RUSSELECTRIC

Russelectric

A Siemens Business

Founded in 1955, Russelectric®, A Siemens Business, provides high-integrity power control solutions for mission critical applications in the healthcare, information technology, telecommunication, water treatment, and renewable energy markets. The company maintains vertically integrated manufacturing facilities in Massachusetts and Oklahoma, where it designs and builds a full line of automatic transfer switches, switchgear, and controls. Russelectric products carry the longest and most comprehensive warranty in the industry and are backed by a team of expert factory-direct field service engineers. To learn more about Russelectric products and the company's commitment to customer satisfaction, visit www.russelectric.com, call (781) 749-6000, or email info@russelectric.com.

Electri-Flex Company Provides Community Meals for Thanksgiving

ELECTRI-FLEX COMPANY, celebrated Thanksgiving this year with its 4th consecutive annual food drive, teaming with community leaders to deliver 700 meals on Thanksgiving day.

Electri-Flex organized 700 meals complete with turkeys in their roasting pans, cans of corn and cranberries, boxes of stuffing and mashed potatoes, and much more. Community leaders provided even more food, which was all boxed and distributed to the public in meal boxes right before the holiday weekend. Sponsors include Electri-Flex Company, the Roselle Police Association Foundation, the DuPage County Sheriff's Office, Fates, Bodily & Parker PLLC, Precision Stamping Products, Meals on Wheels of DuPage County, and SCARCE.

ABOUT ELECTRI-FLEX

electri-flex liquatite®

Electri-Flex Company, a leader in electrical conduit design and manufacture for over 65 years, produces Liquatite®, the most diverse line of liquidtight flexible electrical conduit in the industry. The company offers custom design, engineering, quality assurance and testing capabilities. For more information on Electri-Flex Company, call (630) 529-2920 or (800) 323-6174; fax: (630) 529-0482; e-mail: mktg@electriflex.com; visit: www.electriflex.com; or write: 222 West Central Avenue, Roselle, IL, 60172-1994.

PowerSight®
Power Quality Analyzers & Loggers

CONNECT DIRECTLY TO AND SAFELY MONITOR UP TO 15KV

MODEL 15KVPSET VOLTAGE PROBES

THE MODEL 15KVPSET VOLTAGE PROBES ALLOW CONNECTING POWERSIGHT POWER ANALYZERS DIRECTLY TO 3-PHASE VOLTAGES UP TO 15 KILOVOLTS. NORMALLY, PROFESSIONALS WHO WISH TO MEASURE 12,470 VOLT LINES NEED TO LOCATE OR INSTALL A PT (POTENTIAL TRANSFORMER) IN ORDER TO MONITOR MEDIUM VOLTAGES. THE 15KVPSET ALLOWS DIRECT CONNECTION OF MEDIUM VOLTAGES TO POWERSIGHT ANALYZERS. SHOWN WITH OPTIONAL HOT STICKS, THE 15KVP HAS SHEPHERD HOOKS FOR HANGING ON BARE CABLE, TAPING OR BOLTING TO BUS BAR, OR ANY OTHER CONNECTION THAT IS NEEDED. THE 15KVPSET COMES DISASSEMBLED IN ITS OWN COMPACT CANVAS CARRYING CASE.

NSI's Building Technologies Business Unit Grows with Acquisition of ENET Solutions, Inc.

The Addition of the Aliso Viejo, Calif.-Based Manufacturer & Solution Provider of Compatible Network Peripherals and Connectivity Products Continues NSI's Commitment to Growing its Building Technologies Category

NSI Industries, LLC, a leading provider of electrical product solutions for more than 45 years, has announced that it has acquired ENET Solutions, Inc., an Aliso Viejo, Calif.-based based manufacturer and solution provider of compatible network peripherals and connectivity products, represented by Global Capital Markets, Inc. As part of its commitment to connecting distributors to the products, services, and technologies they require to move forward and satisfy their customers' needs, the acquisition also allows NSI to further key inroads into the Building Technologies market.

"Adding ENET to NSI's family of leading brands is a testament to our commitment to growing our Building Technologies business unit," said Dave DiDonato, NSI Building Technologies president. "ENET's strong product offering portfolio, their ongoing strive for excellence in product performance, and personnel dedicated to being the best in the industry make them an ideal addition to NSI."

Founded in 2003, ENET Solutions, Inc. is a leading solution provider of compatible network peripherals and connectivity products, offering more than 10,000 different connectivity product solutions. Its product portfolio includes high speed OEM compatible transceivers, active optical cable assemblies (AOC), direct-attach copper cable assemblies (DAC), server memory, media converters, network interface cards (NICs), and thousands of different cable solutions, which are designed and manufactured specifically for the most demanding network environments. With an entirely unique go-to-market strategy, ENET focuses on High Performance Computing, Large Enterprise Business, Data Centers, Service Providers and Public Sector. ENET offers a true OEM alternative by offering identical functionality to OEM products and a lower acquisition cost without sacrificing quality or support.

"Our continued growth is the direct result of our dedication to quality through innovation, development, and validation using the industry's most advanced networking and testing platforms," said Jason Barrette, ENET Solutions president. "Much like NSI, the ENET team is comprised of motivated industry professionals with a shared desire and commitment to providing our customers with a greater overall business experience."

NSI Building Technologies, a part of NSI's Electrical Division, is a leader in fiber and copper cable assemblies, pigtails, connectors, patch cords, patch panels, trunks, enclosures, jacks, electronics and components for networking applications, and interconnects, AV cable, USB cables and signal distribution electronics for networking, security & AV applications. The ENET brand joins Lynn and Platinum Tools to expand NSI's offering to Broadband, Data Communications and AV/Security customers. ❑

ABOUT NSI INDUSTRIES, LLC

NSI's core philosophy is *Making Connections*. Focused on the electrical, building technology, and HVAC markets, NSI connects distributors to products, services, and technologies by providing a fresh perspective and caring approach that drives smart solutions. The driving force behind a stable of market-leading brands and a large breadth of products, the company's primary job for more than 45 years has been to fulfill the needs of distributors and their customers. By staying grounded in the principles of service and value, NSI continues to deliver high-quality, industry-advancing, and comprehensive product solutions that enable growth. NSI has many well-respected brands, including Bridgeport Fittings®, Remke Fittings®, Polaris® Power Connectors, TORK® Timers and Controls, Metallics™ Fasteners, Platinum Tools® Network Connectors, Lynn™ Network Components, Duro Dyne® Air Duct Solutions and SUPCO HVAC Repair Products. For additional information about NSI Industries and our family of brands, visit www.nsiindustries.com.

Optronics Introduces Industry's First Temperature-Sensitive Heated LED Lighting Family with Full Lifetime Warranty

Highly efficient and microprocessor-controlled, Optronics' new heated LED lamps automatically monitor ambient temperature and turn heating functions on and off as weather conditions change.

Optronics International, a leading manufacturer of vehicle harnesses, electronic control systems and LED lighting for the global transportation industry, announced the release of its TLL75 Series LED flood beam work lights and STL13 Series 4-inch round LED stop, turn, tail lights just in time for winter weather. The TLL75 Series LED flood beam work light is also being offered with an amber lens that is less reflective in snowy environments.

Some heated LED lighting units use resistors to heat themselves, and as long as the light is on, the lights continue to generate heat. Because heat affects LED lifespan, and because these lights are exposed to excess heat year-round, their service life can suffer and thus warranties are usually strictly limited.

"Unlike many other lamps that are constantly 'cooking' themselves to death, our heating technology only comes on when necessary," said Dustin Smith, vice president of sales for Optronics. "Our lamps are smart, and our microprocessors are programmed to start heating only when temperatures begin dropping below 50 degrees Fahrenheit (10 degrees Celsius), in preparation for ice and snow, and as the environment warms again, they stop heating."

Another unique feature of Optronics' new lamps is the way in which they actually heat. Most of the heated lamps on the market use filaments embedded in their lenses, much like a rear-window defroster. Optronics' heated lamps begin the heating process at the core of the lamp, at the level of the circuit board. The heat then emanates throughout the lamp, quickly warming the entire body of the lamp, including its housing.

"The tiny filaments many manufactures rely upon to heat their lenses can be easily damaged and, once compromised, will fail to defrost their lamps," said Smith. "Just like Optronics' other lamps, our TLL75 Series LED flood beam work lights and STL13 Series 4-inch round LED stop, turn, tail lights employ a solid-state, surface-mount device (SMD) design that protects their electronics, including their heating elements, against moisture, shock and vibration."

The lamps are designed to target commercial vehicles operating in a northern climate with harsh winters. In fact, Smith mused that Optronics had its first order come in from Canada before it even had the new heated lamp products on the shelf. Body builders, upfitters and aftermarket retailers with customers that contend with frigid weather now have a robust, reliable product with a lifetime warranty to offer them.

The TLL75 Series LED flood beam work light and STL13 Series 4-inch round LED stop, turn, tail light heat up quickly to melt ice and snow from their lenses and housings. In fact, performance results in environmental test chambers show rapid, whole-lamp heating. Starting at –22 degrees Fahrenheit, with 5 millimeters of ice on their lenses, the lamps heated to 3 degrees Fahrenheit after one minute, 43 degrees Fahrenheit after five minutes and 100 degrees Fahrenheit after 15 minutes.

The TLL75FHHB work light features a 4,500 raw lumen output and an effective lumen output of 2,800, while the TLL75AHHB work light offers a 2,300 raw lumen output and an effective lumen output of 2,000. ❑

ABOUT OPTRONICS

Optronics products are available in the U.S. and Canada through the company's extensive distribution network of more than 30,000 convenient distribution locations. For information on international sales and distribution of Optronics products, please contact Dorian Drake at +1 (914) 697-9800, or visit http://doriandrake.com.

Affordable test equipment for 2023

Spitifire - Buried Low Voltage Cable Fault Locator

- Accurate
- Easy to use
- High energy output
- Proven reliability
- Compact design
- Lightweight

Wayfind'r - Impulse cable tracer

- Accurate
- Easy to use
- Connects directly to energized cables
- Distinct signal for easy tracing
- Traces direct buried and cables in conduit
- Rugged, compact design

Impulse Phaser - Cable / phase system

- Accurately identifies cables in trenches, vaults, conduits and enclosures
- Accurately identifies phases in multi-conductor cables
- Identifies jacketed, shielded, cables, even in pipe
- Easy to understand and use

RANDL INDUSTRIES, INC.

Install Peace of Mind!

First there was 4 square... and now the **REVOLUTIONARY** 5 Square® Box!!

You've struggled with 4 Square boxes for years - you know how small, cramped and time consuming they are. Finally, there is a solution that allows you the space you have always needed.

The **5 Square®** Boxes (5" x 5" x 2-7/8") provide up to 88 in³ of interior volume which more than doubles that of most existing boxes on the market.

Create a robust and unrivaled infrastructure for the life of your facility with the **5 Square®** Products!

Fire Signal

- TWICE THE VOLUME AS MOST BOXES
- SAVE LABOR...INCREASE PROFITS
- ELIMINATES TROUBLESHOOTING TIME AND COST
- FULLY UPGRADEABLE SYSTEM
- SPECIFIED BY ENGINEERING FIRMS, HOSPITALS, UNIVERSITIES & GOVERNMENT AGENCIES
- AVAILABLE IN ZINC OR RED

Telecommunications

- INTEGRAL CABLE MANAGEMENT
- SAVE LABOR...INCREASE PROFITS
- FACILITATES MIN. BEND RADIUS REQUIREMENTS
- SUPPORTS CURRENT AND EVOLVING SYSTEMS
- SUPPORTS PoE PLUS
